

# Who We Are

We are a non-profit supported by over 750 members who embrace our collaborative working group model and community-building events.

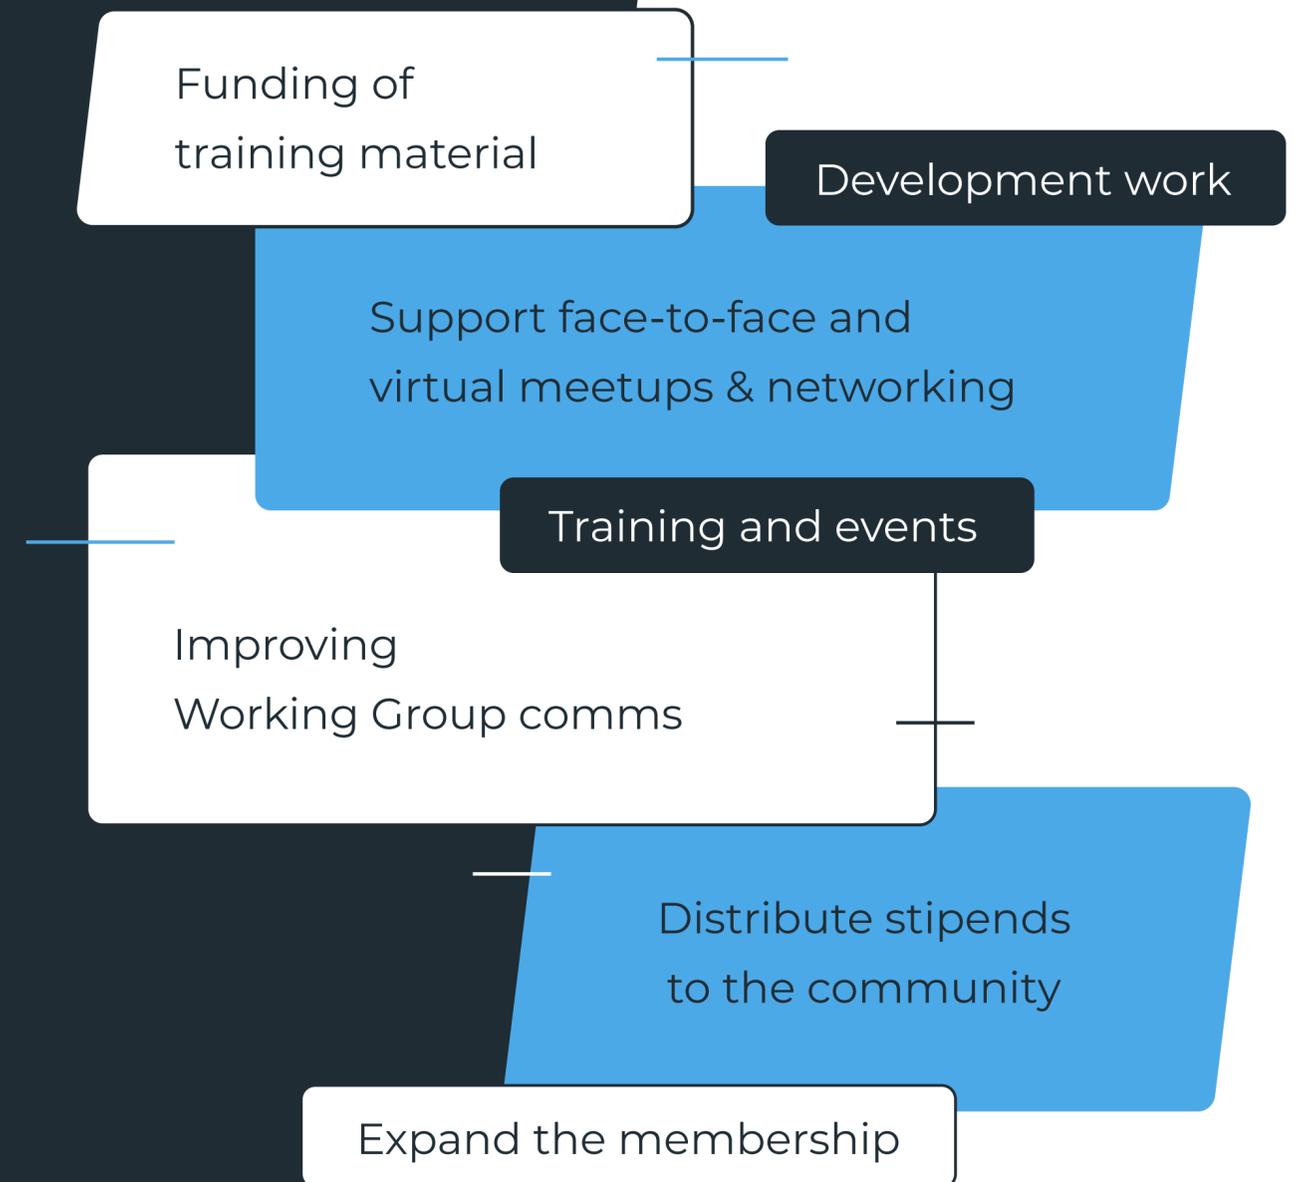

We are here for everyone and our ever-growing community of BEAM languages such as Erlang, Elixir, LFE, Luerl, Gleam, Clojlerl, Caramel, Fika, Hamler, ePHP, Elchemy, Joxa, and OTPCL.

# Goal

Our goal is to grow and support a diverse community around the Erlang and Elixir ecosystem, encouraging the continued development of technologies and open-source projects based on/around its runtime and languages.

A keyword here is diverse. Diversity of individuals and diversity of technology. It is not about Erlang or Elixir, it is about all languages running on the Erlang VM, which we know as BEAM today. But it may not even be about BEAM either. If in the future a new VM comes up and the community finds it important to develop and promote it, then the foundation will focus on it too. The important bit is that the community is the one that guides the foundation. It is a foundation from the community, to the community.

# Working Groups

The Erlang Ecosystem Foundation is organized in working groups dedicated to working on several issues related to the BEAM community and the foundation itself.

Each of these working groups has its own goals, but they all share the common objective of strengthening our organization, giving us professional tools and resources, and contributing to BEAM technologies.

We have 12 active working groups at the moment, to which all of our members can join and contribute.

Know more about their work at <https://erlef.org/wg/>

# Building Community

Our foundation is supported by the volunteer work of our members and the funding of our sponsors.

This support is what allows us to carry out projects, marketing initiatives, and accomplish the goals that we have established as an organization.

We firmly believe that building communally is what makes us grow stronger every day. So if you want to be part of this great community, join us! We look forward to hearing from you!
